To Whom It May Concern,

I am writing to be considered for any current or future podiatrist positions in Washington State.

I am a currently completing my last year of residency at Kingwood Medical Center in Houston, Texas. I will be finished with my residency by July 2019 and am interested in relocating to be closer to my family. As a resident, I have been involved in the treatment of wound care, trauma, flatfoot and cavus foot deformities, sports medicine injuries, arthritis, palliative care and elective podiatric surgeries. I have participated in approximately 600 procedures over the last two and half years. Additionally, I have participated in monthly cadaver labs and journal clubs that have reinforced my techniques as well as illustrated caveats to procedures, from bunions and arthroscopes to flatfoot reconstructions, which have become a keystone in my surgical training.

I have attached my CV with further information below regarding my professional endeavors. I am confident you will find that I possess the skills, dedication and personal characteristics to make a positive contribution to your practice. Please feel free to contact me at the email and phone number listed above with any potential opportunities.

Thank you.

Best,

Shannon Curran
